

ROLE OF MEDICAL FACULTY OF UNSYIAH IN DISASTER

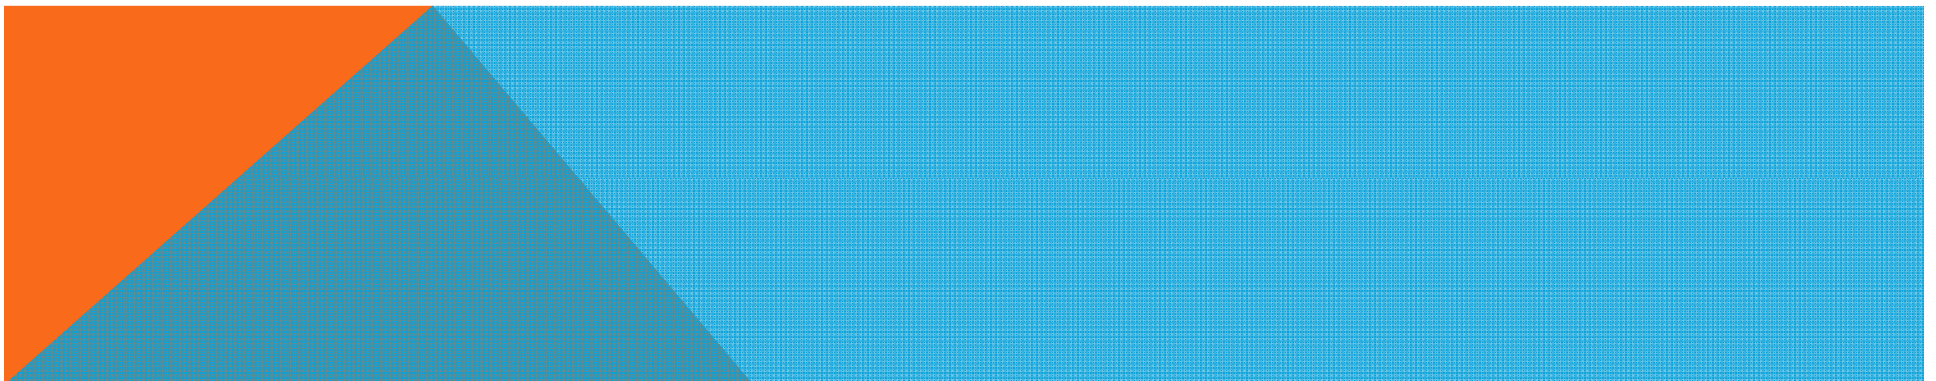

POST TSUNAMI BRIEF

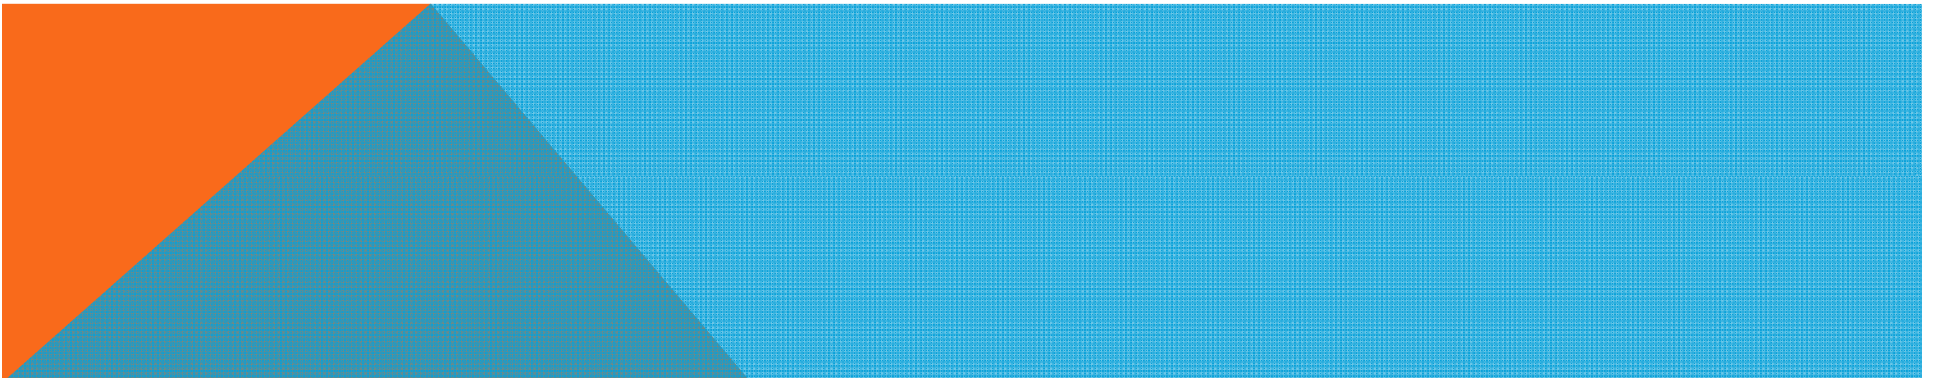

- Tsunami on December 2004:
 - Not only killed and injured hundred thousand of people, but also have severe damage on the facilities include health and education facilities.
- Educational process:-
- Medical Faculty of UNSYIAH:
- For the continuity of education especially

internship at that time, the support of various institutions of universities internship run in 12 Medical Faculties in Indonesia

- Medical Faculty Transformation:
- Changing the curriculum to Problem Based Learning (PBL) including Block Disaster run since 2007 on Ausaid support through Medical Faculty of UGM that also involving Maastric University, Netherland
 - Bock disaster, longitudinal study intend that the students have the ability or the competency to hold the activity before, during and post disaster.

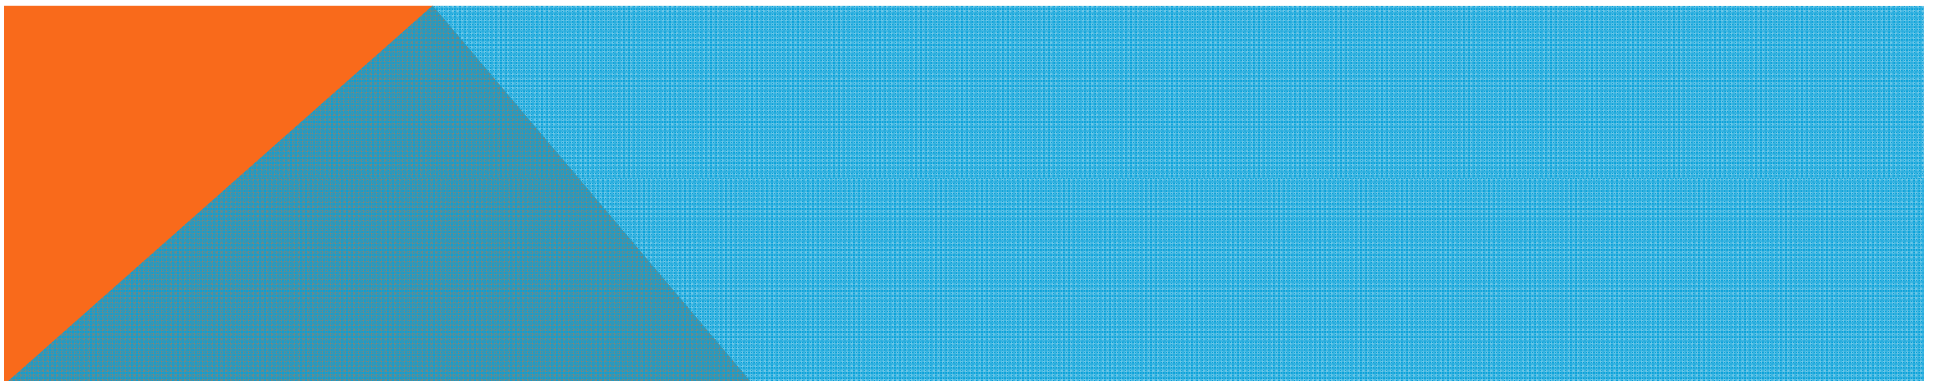

- Block disaster is included in one of the feature block.
 - Advantage: Knowledge improvement, student skill about the disaster, efforts done before and after the disaster.
 - Enthusiasm of staff is quite higher.
 - Disaster simulation is done on a regular basis every year. Participation of cross sector quite big, such as radio between communities (RAPI), Police, NGO and community
- Participated in disaster curriculum development in Nurse Academic schools and involved in teaching of Disaster Management in Magister Level
 - Weakness: reactive to disasters, budgeting for pre-disaster activities, such as drill is very limited,, staff development based on disaster and research is still an obstacle.

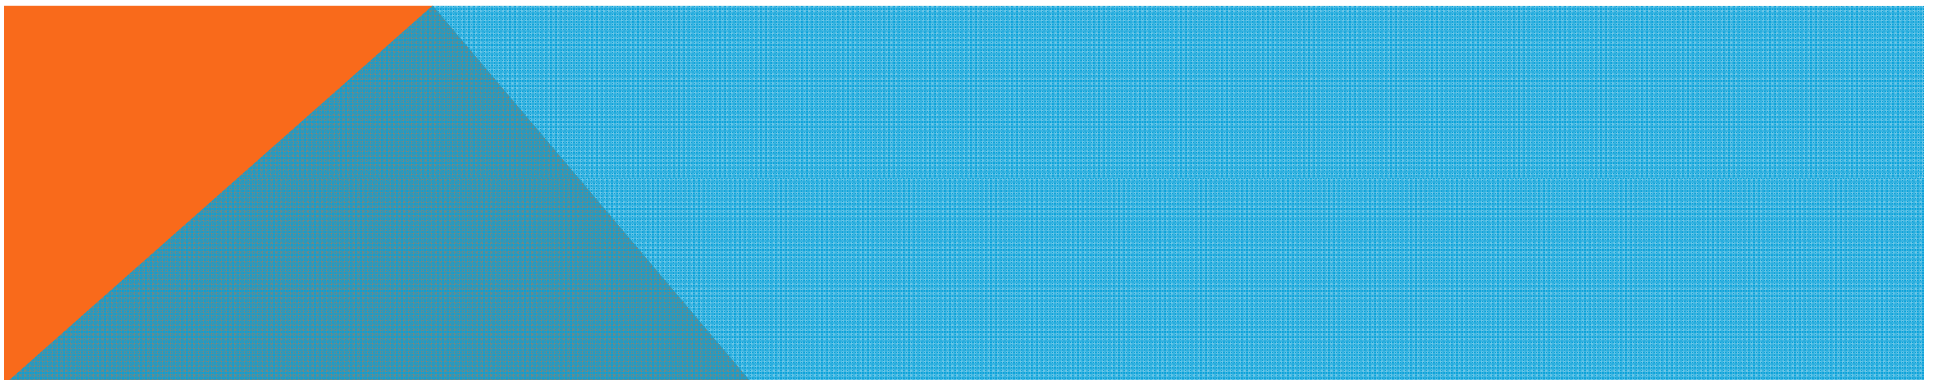

- Participated in disaster curriculum development in Nurse Academic schools and involved in teaching of Disaster Management in Magister Level
 - Weakness: reactive to disasters, budgeting for pre-disaster activities, such as drill is very limited,, staff development based on disaster and research is still an obstacle.

- Establishment of Center Health Service Management (CHSM) of UNSYIAH
 - There is no such unit like this before.
 - Role of PMPK-UGM quite big for establishment of CHSM of UNSYIAH, provide training to the consultants of CHSM.
 - Aimed as a research and consulting institute which aims to provide consultancy, research and training to government agencies, public and private in Aceh.

- As a government partner specially district health office.
 - Provide assistance in changing RSUD to BLUD especially in Aceh Province
- Advantage: transfer of knowledge, accompanied by PMPK accelerating the image of the institution.
- Weakness: lack of staff, high turn over of staff

- Establishment of Psychology Program Study
 - UGM Psychology Faculty has big role in establishment of UNSYIAH Psychology Program Study
 - Accelerate the availability of psychologists, pre-disaster difficult
 - Role of Psychology Program to the community is still limited

- Together with Psychology Community of Aceh, give psychology therapy services and psychosocial.
- Joint with UNSYIAH shelter

- Provide services, psychology consultancy to some PUSKESMAS in Banda Aceh and Aceh Besar
- Obstacle, Health Service Regulation take part in sustainability of psychology services in Primer Services
- Integration with mental disorder services model from Health Office is not optimal
